

FX8 Cockpit Mounting Options

The FX8 Tray:

The FX8 Tray is available from SOLIDFX for \$64.00 plus shipping. The tray is black anodized aluminum, and is designed for use in the cockpit. Weighing only 4.5 ounces the tray is perfect for many different custom mounting solutions!

The FX8 Tray features a set of pre-drilled holes which can be used to mount the FX8 in various ways in your cockpit and can be used with components from various producers.

The pictures in the example above are of an FX8 in an FX8 Tray. The tray is attached to the first piece of hardware listed below (sold separately) which works as a good mounting foundation when using mounting components from RAM Mounting Solutions.

Below are some standard pieces available from Ram Mounting Solutions (www.ram-mount.com) which are compatible with our FX8 Tray. SOLIDFX has tested these components and found them to be a good fit if you are trying to mount the FX8 on your aircraft's yoke. Additionally, Ram Mounting Solutions offers many other compatible mounting options such as glare shield attachments, seat rail mounts, etc...
